

Employment Opportunities for the Kitimat Modernization Project

As the Kitimat Modernization Project (KMP) progresses, there will be a need for Rio Tinto Alcan/Bechtel contractors to hire additional workers. To promote local employment, beginning in January 2011 a process will be put in place to match qualifications and interests to the contractors' needs on the project. Resumes should be submitted in one of the two ways listed below. It is recommended to submit an up-to-date resume even if one has been submitted in the past.
