
CEP, Viability Group
and BC Co-operative Association

THE VIABILITY REPORT IS POSITIVE!

EUROCAN IS VIABLE!

The new model is for a smaller operation.
Sack Kraft produced on one machine thus reducing
the overhead and creating a profitable business.
The Northwest Forestry Coalition can supply all the fibre
required and the internationally respected consulting firm
Poyry Forest Industry Consulting Inc. has been hired to
promote the new mill and contact potential Investors.

Running parallel, the viability group is establishing a Co-op
to invest with the eventual successful investor if required.

Riverlodge Community Room
Tuesday, July 6, 2010 7:00 pm

**Hear about how you can
participate in the opportunity to not only invest
in the mill but invest in the future of the entire
Northwestern Region of British Columbia.**

Key players will be available to answer questions and
explain why the new model will work and could create 270 jobs
at the mill and many more throughout the northwest.
